

DRUM HEATER 0-120°C WITH CASING OF SILICONE RUBBER

Properties

The standard range of drum/barrel heaters in stock specifically designed to heat viscous products and thereby facilitate emptying containers. They are also very effective to keep the content at a consistent temperature and to avoid freezing.

Ideal for heating water, oils, diesel fuel, resin, vaselin, wax e.g. lanolin, fats, butter e.g. butter and many other industrial liquids that must have a uniform temperature or viscosity allows them to be poured or pumped with ease.

The drum heaters has a very robust design making it easy to use and easy to mount on any standard size metal drum. Up to 3 heaters could be attached on a 200 litre standard metal drum.

Technical specification

Material	Casing of durable silicone rubber
Drum sizes	200, 105, 50 and 25 litre standard size drums. Other sizes on request
Assembly	Adjustable quick release spring
Electric connection	3 m power cable without plug
Temperature control	Thermostat 0-120°C
Standards	EN 60335-1, CE

Standard assortment

Power W	Voltage V	Drum size Liter	Dimension LxB mm	Article no
1500	230	200	1700x180	3051190701
1000	230	200	1700x115	3051190801
