

DRUM HEATERS 0-90°C WITH CASING OF TEFLON COATED POLYESTER

Properties

The standard range of drum/barrel heaters in stock specifically designed to heat viscous products and thereby facilitate emptying containers. They are also very effective to keep the content at a consistent temperature and to avoid freezing.

Ideal for heating water, oils, diesel fuel, resin, petroleum, glues, adhesives, jelly, wax e.g. lanolin, fats, butter e.g. butter oil, syrup, sugar and other industrial liquids or foods that must have a uniform temperature or viscosity allows them to be poured or pum-ped with ease.

The drum heaters designed in a durable long lasting high quality lightweight performance with quick release webbing straps to ensure easy attachment to any standard size drum.

Technical specification

Material	Casing of Teflon coated polyester, silicone heating wire and polyester insulation
Drum sizes	200, 105, 50 and 25 litre standard size drums. Other sizes on request
Assembly	Adjustable quick release buckles
Electric connection	3 m power cable without plug
Temperature control	Digital thermostat 0-90°C with timer function
Protection class	IP 40
Warm up duration	Approx. 24 h at 200 litre water from 18°C to 80°C and 1200W Approx. 24 h at 200 litre water from 20°C to 40°C and 530W
Standards	EN 60335-1, CE
